

**Title**

**ERM in Practice – How to Integrate Effectively in Decision and Business Processes for Value Creation**

---

**Speaker**

**Andreas Schlögl, Assicurazioni Generali**

---

**Abstract**

In the past years with the introduction of Solvency II a huge amount of effort was performed for establishment of tools and models for the calculation and disclosure of risk capital. But how to integrate Enterprise Risk Management effectively in the key primary business processes and decisions of the company? And how to use it for creation of value for the company? The presentation will show some real practical examples how ERM is creating value if all the stakeholders in the company work together effectively besides the “pure regulatory compliance”.

---

**Biography**

Andreas Schlögl is the Head of Group Non-Life UW Risk Management at Generali Group working out of Milan. In this role he is responsible for all the Group Non-Life Capital Models, Catastrophe Risk Management and Business Support.

Prior he used to work for a global consulting company and a large reinsurance company having a different set of responsibilities in Enterprise Risk Management methodology and processes. He holds a diploma in business mathematics from the University of Augsburg, is member of the DAV and holds the title as CERA. He acted as a lecturer for DAV and EEA in various trainings for ORSA and Internal Models and is part of the lectures for the CERA Module of “Processes of ERM”.
