

European Actuarial Academy
developing actuaries

Seminar
**Own Risk & Solvency Assessment
(in the Context of Solvency II)**
19/20 March 2013 | Warsaw / Poland

Organised by the EAA - European Actuarial Academy GmbH in co-operation with the Polskie Stowarzyszenie Aktuariuszy

1. Introduction

Capital and Risk management has always been a key activity for both Life/Health and Property & Casualty (i.e. non-life) Insurance companies and Groups. The new risk based regulations under Solvency II lead to new and more formal challenges in this area: This includes a much more formal risk management approach and the need for conducting an "Own Risk & Solvency Assessment". In the last weeks and months the requirements for the ORSA have become much more transparent and it is the right time now for enhancing existing and setting up new processes and documentation around this.

2. Participants

The seminar is open to all interested persons, such as actuaries, risk and capital managers, controllers, supervisors and auditors. Participants only need basic understanding of Solvency II.

3. Purpose and Nature

It is the aim of this seminar that the participants get an overview of the requirements and ideas how practical solutions could look like. Specific focus will be given to the link between risk and business strategy including the definition of risk appetite and limits, the quantitative and qualitative risk identification process as well as the validation of internal model and standard formula assumptions for the ORSA.

On the second day the focus will be on the projection of risk capital and own funds, stress testing and capital management based on a mid to long term view, which are all key parts of the requirements for a “forward looking perspective”. Finally examples will be given what should be the content of an ORSA report.

The seminar will not focus on presentations only, but will include practical case studies and group discussions. Examples will be relevant for Insurance Groups, reinsurance and P&C and Life/Health companies. We recommend that participants bring their laptops for the workshops.

4. Lecturers

Jan-Huug Lobregt

Jan-Huug is a qualified actuary since 2003 within the Dutch Actuarial Association. Jan-Huug has over 15 years of experience in the Insurance Industry. Jan-Huug is leading, as an actuarial partner, in the Dutch PwC actuarial practice advising insurance companies. Jan-Huug is advising insurance companies on risk management, Solvency II implementation, IFRS valuation and the valuation of insurance portfolios. With respect to Solvency II Jan-Huug is involved in projects concerning all three pillars, including model validation, pillar 3 reporting, ORSA and governance implementation.

Stuart Mainland

Stuart is a qualified actuary since 2005 with the Faculty of Actuaries in the UK. As a Senior Manager with Ernst & Young’s European Actuarial Services Organization, he has worked on several Solvency II projects for large UK insurers including the derivation of modelling methodology, validation of an Internal Model and has recently worked with a large global insurer to implement a tool projecting their Solvency II balance sheet for ORSA purposes.

Dr. Nader Razouk

Nader Razouk is a Manager at Ernst & Young and works in the actuarial service practice. The majority of his projects are in the area of Solvency II in particular around Pillar I (Standard Model implementations), Pillar II (ORSA and Governance topics) and IMAP implementation projects. Nader holds a PhD in mathematics and since 2010, he regularly lectures on seminars of the German and European Actuarial Academy.

5. Language

The language of the seminar will be English.

6. Programme
