

EAA e-Conference on Data Science & Data Ethics

16 May 2023 | online

About the Event

The actuarial focus has changed significantly over the last couple of years. Computational power is increasing with exponential growth, in addition more and more data is available. This combination puts the actuarial profession into a position where a new understanding has to be developed on today's possibilities of actuarial science and its ethical implications.

The new role of actuaries within big data and ongoing digitalisation is not yet fully defined. Best practice experience sharing and exchange of ideas is needed. The EAA is delighted to offer all interested actuaries and other experts a forum for knowledge exchange:

On 16 May 2023, the fourth virtual EAA e-Conference on "Data Science & Data Ethics" will take place. The programme will combine keynote speeches with food for thought from well-known experts and selected talks from professionals through a call for papers.

The language of the e-Conference will be English.

Fees & Registration

Your early-bird registration fee is only € 109.00 plus 19% VAT for registrations received by 16 March 2023. After this date, the fee will be € 149.00 plus 19% VAT. As attendance is limited, please register as soon as possible by using the online booking form at our event website:

www.actuarial-academy.com/seminars/conference

After your registration you will receive an invoice and later further details to join the e-Conference via email.

Registration is open until two working days before the e-Conference. If online registration has already been closed, please call us or send an email to contact@actuarial-academy.com.

Participants

The e-Conference on "Data Science & Data Ethics" is open to all actuaries and other interested experts.

CPD

The e-Conference is recognised by many actuarial associations as formal further training. An overview of CPD points under the CPD scheme of several national actuarial associations is available on the event website.

No responsibility is taken for the accuracy of this information.
